

**METHOD AND SYSTEM FOR PRESENTING CUSTOMIZED ADVISORY  
INFORMATION**

**Abstract of the Invention**

A network advisory system that provides customized advisory information to a field service provider is disclosed. The network advisory system receives collected data from one or more destination facilities and analyzes the information to generate customized advisory information. The customized advisory information is used by the field service provider to provide a service at the destination facility. The field service provider may receive the customized advisory information while in transit to the destination facility or while located at located destination facility. The field service provider receives the customized advisory information through a network connection. The network connection may be either a wireless connection or a land-based connection.
